

ATTURU PAVANCHANDH/ Ph.D.

	Nationality: Indian
	Language: English, Telugu, Hindi
	<p>Autobiography: Albert Einstein said nicely “Imagination is more important than knowledge”.</p> <p>As I am first semester student still I just started my work. Not yet experienced things have to experience many situations and along with that have to learn more and have to gain more knowledge. Because I believe that knowledge is like a sea. We think we know everything but it finds its way to surprise us.</p> <p>My research in Prof. Vinoth Kumar lab was focuses on the Sample preparation techniques. Such as I am focused on solid phase extraction. I just started my work I am using Liquid chromatography Mass Spectroscopy for my project. And willing to learn more techniques.</p> <p>Apart from research, there are many things to learn as it just starting I will explore more and have plans to take part in some extracurricular activities as well.</p>

Doctoral:

Institute: Kaohsiung Medical University, Kaohsiung

Research field: Nano and green analytical Chemistry

Thesis supervisor / Co-advisor: Prof. Vinoth Kumar

Master:

Institute: Vellore Institute of technology, Tamil Nadu, India

Research field: Analytical Chemistry

Thesis supervisor / Co-advisor: Dr. Annamalai Senthil Kumar
